

BASIS TECHCON COMES TO CANADA

MONTREAL QUEBEC, 8:00AM September 19th and 20th 2011

As a departure from the Descore Showcase of years past, this year Descore ups the ante on the technology front to present *BASIS TechCon Canada*, which follows the tremendous success of the BASIS TechCons recently held in both the US and Germany!

Come to see all the technical buzz about...

- Browser User Interface
- Cloud technology
- Barista Application Framework development tool
- AddonSoftware ERP building blocks

Read what some said about their recent TechCon experience:

"This was my fifth TechCon and all along I've been ahead of BASIS, but this time I'm actually behind. I am anxious to catch up to BASIS with all they showed. Actually, I have been hosting an app on my server and now I can move it to the cloud. This is cutting edge stuff!"

"BASIS presented an impressive list of rich and useful enhancements to the product set!"

"Replication is a really big deal. I already know of several clients who have immediate use-cases for it. They began asking about this a few months ago so this is very timely. BASIS never fails to impress at their TechCons."

Take advantage of this opportunity to attend this technical conference led by the BASIS Albuquerque team of experts while networking with your colleagues.

Bring a guest and arrive early to enjoy the entire weekend in picturesque Montreal.

VENUE Delta Centre-Ville, Montreal
www.deltacentreville.com
