

## TECHCON CANADA BASIS TECHCON COMES TO CANADA

### Session Overview

### Partnership

#### ***Network With Your Peers***

Network with your peers to discuss your priority issues such as data access, disaster recovery, Sarbanes-Oxley compliance, system performance, and more. This open discussion forum gives our VAR community the opportunity to explore how other companies address these issues using BASIS technology. BASIS engineers will be on hand to discuss ideas, solutions, and learn from your real-world experiences. Please join us at TECHCON CANADA to share information and ideas that address your IT strategy needs.

### Language/Interpreter

#### ***BASIS Revolutionizes Web Apps***

In one fell swoop, BASIS enables your desktop app for the Web...nothing new to learn...write your app as if for the desktop and it magically appears on the Web. BASIS even ships with a built-in Jetty web server to serve up the application to your desktop, laptop, smartphone or tablet of choice.

#### ***New BASIS Tools for Cloud-Enabling Your App***

Discover how PDF printing, XCALL, and Google App integration allows you to be both cloud-capable and to leverage the cloud's benefits in your PRO/5, Visual PRO/5 and BBJ applications.

### Database Management System

#### ***New Database Techniques and Optimizations for Managing Your Data in the Cloud or Onsite***

New tools from the OS, BASIS, and Open Source libraries to help you make live backups, speed data access and otherwise manage your data wherever it lives. Come learn how to use the new maturing online copy job interface to make your backups, upgrade your customer, and add new keys without ever interrupting your PRO/5, Visual PRO/5 and BBJ users.

#### ***Unveiling BASIS Database Replication and Trigger Enhancements***

Learn how to use the new "database replication" for your back-up and recovery requirements without changing a line of code in your application. The new enhancements to the online copy jobs and the optimizations to the triggers give you a

faster ways to keep your data safe and archived. See the new granular, faster triggers available in 11.00 for the first time.

## Development Tools

### ***How to Write Visually Appealing Apps With the BASIS Toolset***

The IDE achieved a new level of maturity with the recent port to Java 6. The ability to run, compile, and achieve Java 6 code-completion was a major milestone. Now everyone can build modern aesthetically pleasing CUI/GUI/BUI applications using FormBuilder, AppBuilder, and the enhanced code-completion system on the latest Java platform.

### ***Go RAD With Barista and Bring Your Own Code for Morphing***

Barista is a RADical tool, but it is not magic. When you need greater granularity to your programming, break out your FormBuilder/AppBuilder skill and build what you need and then graft it back into your Barista Application Framework.

## System Administration

### ***Installing and Administering Your System in the Cloud or Onsite Just Got Simpler and Easier***

Web Start deploys anything built in Java, from the EM, to the TC, to the Installer, including your application. Cloud integration is a snap with the built-in Jetty Web Server that comes with every installation. See the additional feature and function that allows users to save files in the cloud and print from the cloud. If you want to follow BASIS into the cloud, you can use the Amazon Beanstalk and a customized BBJ AMI. All the money you save your customers in hardware costs are free to be spent on consulting fees and software.

### ***Enterprise Manager - From Wizards to the Secret Incantations of the Spellbook***

Wizards are the wow-factor in the Enterprise Manager this year. If you ever thought that technology was getting too hard to deploy, just give these wizards a try before you throw your hands up in despair. If wizards aren't your preference, discover how BASIS published the EM API so you can access all the features and functions programmatically.

## Applications and Building Blocks

### ***Leapfrog Your Development Obstacles by Adopting BASIS Application Building Blocks***

Spend your time delivering the value-add that your customers need and let AddonSoftware take care of the standard Accounting, Distribution and Manufacturing components. Furthermore, with BASIS provided utilities and Java libraries, you eliminate costly third-party products like report-writers, fax and e-mail utilities, keeping the cost low to your customers and preserving your margins.

### ***Inside the Accounting Bundle***

Barista/AddonSoftware Accounting has been in the market for almost two years and stands as a solid core for vertical product development. With the 11.x release being capable of Browser deployment, the opportunities are endless.

### ***Inside the Distribution Bundle***

AddonSoftware Distribution has been in the field for more than a year, so the maturity of the module and the robustness of the feature set make it a powerful component of the Addon stack. Learn more about the inner workings of the package as well as the tips and tricks that close the sale. With the recent addition of the EU VAT capacity this module is even more appealing to customers anticipating global growth.

### ***Mods at the Speed-of-Light, Preserved Through the Upgrade Cycle***

Customizing AddonSoftware is the greatest sales and moneymaking opportunity that most VARs experience. Learn how to make those mods without chaining your customer to an antiquated version of the product.
